

AGE 02 02: Verbs and Accents Worksheet

Review thoroughly the first page of the “Rule for Accents Verbs” handout (the section on Verbs and the Recessive Accent), as well as the second page (the section on Enclitic Accents and εἰμί and φημί). Once this is done:

1. Provide the proper accents for the word/enclitic pairs. Supply the additional accents (if there are any) caused by the enclitic.

Note that the second word is always an enclitic. Though not all the following enclitics are forms of εἰμί and φημί, ALL ENCLITICS follow the same rules of accents given on your accents handout.

2. Cite the accent rule that you are applying in each situation. This can be done by giving the Arabic Numeral from the section on Enclitic Accents and εἰμί and φημί.

e.g. ἄνθρωπος τινες: ἄνθρωπός τινες (1)

(here, it is 1 because “1” states that “If a verb form has three or more syllables, and the ultima of the word contains a single short vowel, the accent recedes to the antepenult”)

ἀγαθοί τινες

ὀπλίτης τις

ἄνθρωπος ἐστίν

ἡμέρα ἐστίν

στρατιῶται εἰσιν

ἀγαθῶν τινες

ὀπλίτης φησίν

δέ ἐστίν
